	<ul> <li>Stopcem EP TOP WB is a two component, Epoxy resin water based, with glossy appearance, suitable as finishing Anti-dust coat, strengthening and impregnating agent function as well as binder or additive function with cemer Mix, to improve its mechanical performances.</li> <li>Note: Like other materials of the same nature and type, also Stopcem EP TOP WB polymerized film, when exposed in air in external ambient, due to the action of atmospheric agents (sun, rain etc. ) may undergo colour changing with chalking and tarnishing. These phenomena are only aesthetic ones and do not indicate a loss of the corrosic protection property from the coating itself as the characteristic of the film is not altered.</li> </ul>				
ECHNICAL DATA	Specific Gravity A+B	kg/l	1,05 ± 0,05	5 @ +20℃	
	Solids by Weight: Solids by Volume:	%	35 ± 2 % 33 ± 2 %	A+B	
S	Mixing Ratio by Weight:		100 parts	of Base / 30 parts of Hardener	
	**Pot life @ +20°C:		≥ 3 hours		
	Colour		Colourless	i	
PREPARATION	Homogenize the Base and the Hardener in the original containers. Add the Hardener to the Base and mix to get a complete homogenization. (Dilute if necessary)Let the mix rest for 5 - 10 minutes before the application.

## STOP CEM EP TOP WB

Two component water based epoxy resin

	Note	: The hardening and film forming time of the product depend on Relative Humidity and ambient temperature. In enclosed areas provide the necessary air circulation during Hardening.			
	Recoat interval @ +20°C:	Min. 24 – Max. 48 hours with R.H. < 55%			
	Application Ambient Temperature: Suggested Temperature of the product: Substrate Temperature:	Between +5°C and +40°C +10 ÷ +40°C +5 / +40°C always at least +3/5°C above dew point			
	Relative Humidity:	≤ <b>8</b> 5%			
	Thickness: Theoretical spreading rate: sqm/kg	N/A ~8-10 depending on concrete mix absorption			
	More info by writing to sales@industriebrunostoppanipaints.com or by calling +39 030 9745116				
HANDLING STORAGE AND SAFETY PRECAUTIONS	<b>Warning:</b> All handling and/or use activities of the material and its components must strictly refer to the given indications in the Safety Data Sheet (Base and Hardener). The following advices are stated by common sense and in good faith, they are uncompleted and do not substitute the content of each specific safety data sheet of the product.				
	<ul> <li>Handling: The material must be used only by professional and qualified applicators suitably trained. All the operations involving the use of the product, must be carried on in compliance with all the relevant National Health, Safety &amp; Environmental standards and regulations.</li> <li>Precautions: When the product is used in enclosed areas (rooms, containers, vessels, etc.) it is imperative to use adequate means providing the necessary air circulation, to be granted during the whole application and coating polymerization time, also to avoid conditions open to potential explosion danger.</li> <li>All electrical installations must always be grounded. Where explosion hazards exist, the workmen should be required to use only non-ferrous tools and wear conductive non-sparking shoes and clothing. Explosion and flame-proof equipment too are required.</li> </ul>				
	Storage and transport: Keep far from flames, sparks or heat sources. Do not leave exposed under direct solar action. Store under shelter in original unopened packaging, in cool, dry and ventilated areas, at temperatures between +5°C and +35°C. Important : this is a water based product and can be affected by frost				
Shelf life:		se 12 months in the suggested storage conditions (original unopened packaging) rdener 12 months in the suggested storage conditions (original unopened packaging)			
N.B.: Product for professional use only and exclusively for the uses not regulated under CE Directive 2004/42/CE.					
Refer to Material Safety Data Sheet
