INDUSTRIAL MARKET

A WIDE RANGE OF SOLUTIONS STUDIED TO PROTECT, PRESERVE AND TO ENHANCE

Liquid paints and highly performing "specialties", for the protection of industrial works operating in a wide range of exercise and environmental conditions, products studied for specific resistance requirements of imperative protective and corrosion inhibiting characteristics, of environment aggressions degree, of substrate preparation possibilities, of application system, possible contact with alimentary substances

if any and everything else influencing the requirements of the application. Stoppiani products range selection includes one and two component products of different chemical nature: Acrylic, Vinyl, pure or modified Epoxy or Polyurethane, Alkyd, Chlorinated rubber, and others. We offer high solids and low volatile organic compound content, solvent free, water based: all of these studied for the specific requirement

considered, without neglecting traditional solvent based products. You can select coating systems, one pass or many coats products, with special formulations, high thickness paints, tie coats, zinc based paints (cold system), surface tolerant mastic, intermediates, finishing coats, temporary protective paints, filling masses, sealers.

OIL INDUSTRY

- Vessels coatings (tanks, cylinders, etc.):
Crude oil
Refined products
- Protection of drilling equipment and on/off-shore platforms
- Metal structures
- Walls and floors
- Tubes
- Refining plants

URBAN AND RAILWAYS TRANSPORTS

- Cistern and tank lorries:
Internal protection
External protection
- Concrete mixer
- Containers

CHEMICAL INDUSTRY

- Coatings for metal infrastructures
- Coatings for tanks and vessels
- Solutions for wells and condensers
- Walls and floors

POWER INDUSTRY

- Solutions for frameworks and accessories for power industry (transformers etc)
- Hydroelectric penstocks
- Wind installations

AGRICULTURE

- Walls and floors
- Steel
- Machineries and installations

PUBLIC WORKS

- Bridges, rails etc.
- Concrete structure
- Traffic areas
- Drainage systems
- Water distribution and transport, hydraulic systems

PIPELINES

- External protection of tubes, joints, valves and fittings
- Internal coating of tubes and fittings transporting:
 - Gas
 - Potable water
 - Brackish water
 - Oils and greases
 - Petrochemical by-products (refined or not)
 - Discharges and sewage
 - Slurries

ALIMENTARY INDUSTRY

- Walls and floors
- Steel
- Tanks coatings
- Oil and wine vessels

SPECIALTIES

- Coatings for wire accessories and cooling circuits of condensers
- Solutions for drums
- Materials for underwater applications
- Traffic areas buildings (sealers, stone protection, signaling coatings etc)
